

ICBP2015

The 5th International Conference on Bio-based Polymers

24 – 27 June 2015, Singapore

Topics

1. Biological syntheses of bio-based polymers and monomers
2. Syntheses of bio-based polymers via chemical routes
3. Material design of bio-based polymers
4. Applications of bio-based polymers

Important Dates

15 February 2015: Short-abstract (300 words) submission

15 March 2015: Acceptance of submission

30 April 2015: Full abstract (one-page) submission

Invitation

On behalf of the Organizing Committee of ICBP2015, it is our great honor and pleasure to invite you to the 5th International Conference on Bio-based Polymers (ICBP2015), which will be held from 24th – 27th June 2015 in Singapore. Previous conferences were been successfully held in November 2003 at RIKEN, Wako, Japan, in November 2009 at Universiti Sains Malaysia, Penang, Malaysia, in October 2011 at Peking University, Beijing, China and in September 2013 at Hanyang University, Seoul, Korea, respectively.

ICBP2015 will be designed to offer a unique opportunity not only to take a critical examination of the milestone achievements in bio-based polymers but more significantly, to discuss how bio-based polymers can contribute to global sustainability in the 21st century. The program will feature contributions from both established and young scientists and engineers, and will provide a platform for representatives from all over the world.

We are confident that this event will bring together scientists, engineers, business leaders and government officials to foster and enhance collaborative contacts, and to exchange information in the many interdisciplinary areas of modern bio-based polymers. We look forward to welcoming you to Singapore in June 2015!

Sincerely,

Chairpersons:

Prof. James Goh (National University of Singapore, Singapore)

Assoc. Prof. Jun Li (National University of Singapore, Singapore)

Prof. Tadahisa Iwata (The University of Tokyo, Japan)

Dr. Hideki Abe (RIKEN, Japan)
